**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Group I. Claims 1 and 4-11 are, drawn to a circular saw including a saw blade depth adjustment detent mechanism, classified in class 30, subclass 375.
- Group II. Claims 22-31 are, drawn to a circular saw including a bevel angle adjustment detent mechanism, classified in class 30, subclass 376.
- Group III. Claims 2-3 and 12-21 are, drawn to a circular saw including a saw blade depth adjustment detent mechanism and a bevel angle adjustment detent mechanism, classified in class 30, subclass 377.

The inventions are distinct, each from the other because of the following reasons:

Inventions of group III and groups I-II are related as combination and subcombination. Inventions in this relationship are distinct if there is evidence that the combination does not rely on the subcombination for patentability. See MPEP 806.05 (c), example 3. For example, group II is evidence that the combination of group III does not rely on the saw blade depth adjustment detent mechanism of group I for patentability, and conversely, group I is evidence that the combination of group III does not rely on the bevel angle adjustment detent mechanism of group II for patentability.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and

Art Unit: 3724

because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Choi whose telephone number is 703-306-4523. The examiner can normally be reached on Monday-Friday 9:00-3:30.
